Senior Backend Engineer

Acme Analytics - Remote (EU time zones)

About the role

We are hiring a backend engineer to build our TypeScript data platform.
You will design APIs, own Postgres schemas and run services on Kubernetes.

Requirements

- 5+ years of TypeScript or Node.js experience
- Strong PostgreSQL and Redis skills
- Experience with Docker and CI/CD pipelines

Nice to have

- Bun, Effect or functional programming
- Salary: EUR 80,000 - 95,000 per year
